

# Quality and Environmental Policy

At Inter-Teknik, as we provide services to the energy and industrial sectors, we highly prioritize customer satisfaction and environmental sustainability. Therefore, we embrace the following quality and environmental policy:

## Customer Satisfaction

We are committed to providing high-quality products that meet and exceed our customers' expectations. We pledge to continuously improve our products by taking customer feedback into consideration.

## Product Quality

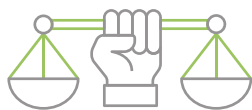

We consistently set high standards for the quality of our products. By implementing strict quality control processes, we strive to ensure the reliability and performance of our products.

## Environmental Responsibility

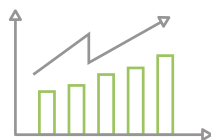

We work in accordance with environmental sustainability principles to minimize environmental impacts in our processes. Our goals include efficient use of resources, waste reduction, and promotion of recycling. Environmental awareness is the responsibility of all our employees.

## Legal and Regulatory Compliance

We commit to fully complying with relevant legal regulations and environmental requirements in our operations. Through regular review of our business processes, we take necessary steps to ensure compliance with all requirements.

## Continuous Improvement

We continuously review our quality and environmental performance and take necessary measures for improvement. We encourage employee participation and increase awareness of quality and environmental issues through training and awareness programs.

This quality and environmental policy is based on the understanding and support of all our employees and suppliers. Our company expects everyone to contribute jointly to maintaining quality standards and ensuring environmental sustainability.
